IX Death rates per 100,000 of population from selected causes, First Quarters 1956 to 1961	27
X Causes of Stillbirth, by sex, during the quarter	27
XI Cases of Infectious Diseases notified to the Department of Health for Scotland in the 13 weeks ended 1st April 1961	28
Estimated Total Population of Scotland at 30th June 1960, projected to Mid-1980, by sex and age	29
Meteorological Notes for the quarter supplied by Meteorological Office, Edinburgh	30
Abstract of Meteorological observations made at eleven of the Principal Towns during the quarter	31

EXPLANATORY NOTES

Birth, death and marriage rates are calculated on the estimated population at 31st December, 1960.

Reference to average or average rate are to the average rates for the corresponding quarters of the five years 1956-1960.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth rate shows an increase compared with the average of recent first quarters.

The stillbirth-rate is the lowest recorded for any first quarter.

The marriage-rate is below the average.

The death-rate is above the average. The increase is largely due to the rise in respiratory deaths.

The infant mortality rate is below the average.

Live Births. 25,597 births were registered in the quarter under review, 367 more than in the corresponding quarter of 1960. The rate per 1,000 population is 19.9, being 0.4 higher than the rate for the corresponding quarter of 1960 and 0.3 above the average.

The proportion of illegitimate births, 4.4 per cent., is 0.1 above that for the first quarter of 1960 and 0.3 above the average.

Of the 25,597 births, 13,166 were of male children and 12,431 of female children, being 1,059 male births per 1,000 females. Births registered in January numbered 8,566, in February 7,975, and in March 9,056, the equivalent birth-rates being 19.4, 20.0, and 20.5 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 520 and is equivalent to a rate of 20 per 1,000 total births (including stillbirths) which compares with 24 per 1,000 in the first quarter of 1960.

Marriages. The number of marriages registered, 10,000, is 272 fewer than for the first quarter of 1960. The rate per 1,000 population was 7.8. It is 0.1 below that for the corresponding quarter of 1960, and 0.7 less than the average.

Of the 10,000 marriages, 2,025 were civil marriages contracted in registrars' offices. The remainder, 7,975, were solemnised by a minister of religion. In the corresponding quarter of 1960 civil marriages numbered 1,845, those with a religious ceremony numbered 8,426, and there was also one irregular marriage.

Marriages registered in January numbered 2,016, in February 2,498, and in March 5,486, the equivalent marriage-rates being 4.6, 6.2, and 12.4 respectively.

Deaths. Deaths registered during the quarter numbered 18,750 and equalled a death-rate of 14.6 per 1,000 population. They are 1,556 more than were registered in the corresponding quarter of 1960. The rate is 1.3 more than in that quarter, and 0.2 above the average.

Deaths registered in January numbered 6,734, in February 6,462, and in March 5,554, the equivalent death-rates being 15.2, 16.2, and 12.5 respectively.

Infant Mortality. Deaths of children aged under one year numbered 757 and are equivalent to an infant mortality rate of 30 per 1,000 registered live births. This rate is one more than that for the corresponding quarter of 1960 and one below the average. Among legitimate children the mortality was 29 per 1,000 births and among illegitimate children 41.

The neo-natal rate (deaths of infants under 28 days) was 19 per 1,000 live births and is the same as that for the corresponding quarter of 1960. Perinatal deaths (stillbirths and infants under 28 days) numbered 996 and are equivalent to a rate of 38 per 1,000 total births (including stillbirths).

Sickness Benefit. The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 28th March, 1960, was 353,012 of which 95,381 were in Glasgow, 30,580 in Edinburgh, 14,534 in Aberdeen, and 11,856 in Dundee.

SCOTLAND

Estimated Total Population, Mid-1960, projected to Mid-1980 by sex and age

Basis: Mid-1960 estimate of Total Population (including Scottish Armed Forces and Merchant Seamen at home and abroad, but excluding Forces stationed in Scotland who are not of Scottish domicile).

Assumptions

Mortality: Steady decline of death rates over the period to about one-half of the rates experienced in the years 1955-59 at ages under 45; and progressively less improvement at ages over 45.

Fertility: Births averaging 100,000 in first 5 years, 105,000 in next 10 years, thereafter rising to about 110,000 in 1980. Male to female ratio 1.06.

Migration: Annual net loss of 20,000 (10,000 males and 10,000 females).

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

JANUARY 1961

The mean temperature (37.3°F) was 1.0° below average. The warmest days were around the 11th, 12th and 27th. Temperature reached 57°F at Lossiemouth on the 27th. Highest night minimum temperature was reported from Stornoway 45°F (12th). The coldest day temperature was reported from Dalwhinnie on the 26th, 29°F (3° of air frost). The 7th, 11th and 16th were mainly the coldest nights and night frosts around these dates were widespread. The lowest air temperature reported was at Grantown-on-Spey (16th), 10°F (22° of air frost). The lowest ground temperature was Tarfside, 4°F (28° of frost) on 16th.

The driest periods during the month were from the 13th to 17th and 21st to 25th. On the 11th and 26th heavy falls were quite general and falls of over three inches were reported as follows: $3.05''$ Kingairloch (26th), $3.04''$ Loch Harport (11th). Rainfall totals for the month were below average in all districts except for the coastal strip of East Scotland (North of the Tay), S.E. districts and a local area in Argyllshire.

In the North and West, sunshine was above average and at Tiree 68 hours were recorded, the highest January total since 1939. Stornoway's total of 61 hours was the highest January total there since records began in 1881. The eastern half of the country was less fortunate and deficits were reported from most places.

Thunder occurred on 6 days, snow or sleet on 27 days and morning fog on 24 days.

Gales occurred on 17 days. A gust of 95 knots (109 m.p.h.) was recorded at Lerwick Observatory on the 27th (the highest gust reported at Lerwick since recording began).

FEBRUARY 1961

The mean temperature was 43°F or 3.9° above average. It was the mildest February in Scotland since 1945. The mildest days in most areas came in the third week. The highest reading was 60° at Achany, Lairg on the 16th. The first week was easily the coldest of the month. On the 4th there was frost all day (32°F) at Dalwhinnie and Glenlivet, and quite low night temperatures were registered between the 2nd and 5th. The lowest minimum was 13°F (19 degrees of frost) at Olgrinbeg, Caithness on the 4th. Thermometers exposed on the ground registered 3°F (29 degrees of frost) at Glenlivet on the 2nd.

Sunshine exceeded average over the greater part of the country. At Nairn and North Berwick there was an excess of about 25 hours. The sunniest place was Dunbar (110 hours).

A good deal of rain fell in the first, second and last weeks but amounts were not large in East Scotland. The precipitation fell widely as sleet or snow in the first week, and snow lay several inches deep in places on the 2nd-5th. There was a spell with little or no rain in the third week. Total precipitation as a whole showed a moderate to large excess in Central and Western districts but only about two-thirds of average fell along the East Coast. Falls exceeding an inch in 24 hours were numerous on the 5th, 8th, 12th, 26th and 27th. At Dalness, Glen Etive 1.99 inches fell on the 5th and 2.14 on the 8th.

Gales occurred at times during the first half of the month and all districts were affected by a severe gale on the 26th/27th. Fog was fairly widespread on the 22nd-25th and it occurred locally in the first two weeks. Thunder was heard at places on the 6th-9th and 27th-28th.

MARCH 1961

The mean temperature was 4.68°F , 5.2° above average, and it was the warmest March with the exception of 1938 for at least 106 years. The mildest days occurred around the 9th in Northern districts and around the 16th and 29th elsewhere. On the 9th temperature reached 68° at Halkirk (Caithness). Highest night minimum was reported from Strathy, 51° on the 9th. The coldest periods were generally around the 6th, 18th and 19th, on the 27th and around 30th and 31st. The lowest day temperature (34°) was reported from Lerwick (27th) and the lowest night minimum recorded was 20° (12 degrees of air frost) at Halkirk. Thermometers exposed on the ground registered 17° (15 degrees of frost) at Wick on 31st.

Sunshine exceeded the average only in some Eastern and Central Districts. At Perth there was an excess of 28 hours while Oban had a deficit of 43 hours. The sunniest place was Dunbar, 146 hours.

Rainfall was above the average in the North and West and below the average elsewhere. Some areas of Wester Ross and in West Inverness-shire amounts were as much as 150 to 200 per cent of normal. At Arbroath the total for the month was only .34 inch. The heaviest fall, of rain generally occurred on the 11th, 17th, 28th and 29th. On the 11th in the Fort William area the following amounts were registered—Lundavra (3.13 ins.), Glasdrum (2.36 ins.), Gairloch (2.36 ins.) and Kinlochbourn (2.17 ins.). Snow was reported from many places around the 16th-20th and again during the last few days of the month when moderate falls occurred in the North.

Thunder occurred on 2 days, gales on 20 days and morning fog on 14 days.

ABSTRACT OF METEOROLOGICAL OBSERVATIONS

Abstract of Meteorological observations made at eleven of the Principal Towns during the quarter	31

EXPLANATORY NOTES

Birth, death and marriage rates are calculated on the estimated population at 31st December, 1960.

Reference to average or average rate is to the average rate for the corresponding quarters of the five years 1956-1960.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth rate is below that for the second quarter of 1960 but is above the average.

The stillbirth-rate is below the average.

The marriage-rate is above that for the corresponding quarter in 1960 but a little below the average.

The death-rate is above the average. The increase is largely due to the increase of deaths from heart disease.

The infant mortality-rate is below the average.

Live Births. 25,895 births were registered in the quarter under review, 281 fewer than in the corresponding quarter of 1960. The rate per 1,000 population is 19.9, being 0.3 below that in the second quarter of 1960 but 0.1 above the average.

The proportion of illegitimate births, 4.6 per cent., is 0.1 higher than that for the second quarter of 1960 and 0.2 above the average.

Of the 25,895 births, 13,036 were of male children and 12,859 of female children, being 1,014 male births per 1,000 females. Births registered in April numbered 8,459, in May 9,070 and in June 8,366, the equivalent birth-rates being 19.8, 20.5 and 19.5 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 566 and is equivalent to a rate of 21 per 1,000 total births (including stillbirths). The rate is the same as that for the corresponding quarter in 1960 and one below the average.

Marriages. The number of marriages registered, 8,559, is 562 more than for the second quarter of 1960. The rate per 1,000 population was 6.6. It is 0.4 above that for the corresponding quarter of 1960 but 0.2 below the average.

Of the 8,559 marriages, 1,535 were civil marriages contracted in Registrars' offices, 7,023 were solemnised by a minister of religion and there was one irregular marriage. In the corresponding quarter of 1960 civil marriages numbered 1,440, and those with a religious ceremony numbered 6,557.

Marriages registered in April numbered 3,671, in May 1,570 and in June 3,318, the equivalent marriage-rates being 8.6, 3.5 and 7.7 respectively.

Deaths. Deaths registered during the quarter numbered 15,189 and equalled a death-rate of 11.7 per 1,000 population. They are 421 more than were registered in the corresponding quarter of 1960. The rate is 0.3 more than in that quarter and 0.3 above the average.

Deaths registered in April numbered 5,104, in May 5,355 and in June 4,730, the equivalent death-rates being 11.9, 12.1 and 11.0 respectively.

Infant Mortality. Deaths of children under one year numbered 659 and are equivalent to an infant mortality rate of 25 per 1,000 registered live births. This rate is one less than that for the corresponding quarter of 1960 and one below the average. Among legitimate children the mortality was 25 per 1,000 births and among illegitimate children 43.

The neo-natal rate (deaths of infants under 28 days) was 18 per 1,000 live births and is the same as that for the corresponding quarter of 1960.

Perinatal deaths (now amended to stillbirths and infant deaths under 7 days) numbered 983 and are equivalent to a rate of 36 per 1,000 total births (including stillbirths), the rate for the previous quarter being 35.

Sickness Benefit. The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 27th June, 1961, was 217,343 of which 61,064 were in Glasgow, 15,614 in Edinburgh, 7,366 in Aberdeen and 8,234 in Dundee.

LOCAL GOVERNMENT ELECTORS, 1961

This table has been compiled from returns furnished by Town Clerks and County Clerks, and shows the aggregate number of local government electors for Scotland, counties of cities, large and small burghs, landward areas and districts (district council areas; where elections are held every 3 years). The figures indicate to what extent seats on Councils were contested and the percentage of the electorate who voted at the local elections held in May this year. For comparison percentages are also shown for the years 1958, 1959 and 1960.

A detailed analysis of the local government election results is published each year in the Registrar General's Annual Report.

Local Government Electors and Analysis of Local Elections on the 1961 Register and Percentage of Electorate who voted.

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

APRIL 1961

The mean temperature, 47.1°F, was 2.0° above average.

A temperature of 65°F at Castle Douglas on the 18th was the highest for the month and the highest night minimum temperature was 50° on 21st reported from Kinlochewe, Duntulm (Skye), Falkirk, Midcalder and from various stations in Edinburgh. The coldest spell was during 1st to 4th and the lowest day temperature was 35° at Braemar on the 4th. The lowest night temperature was 12° (20 degrees of frost) at Glenlivet and Tarfside on the 4th and on the same date a thermometer exposed on the ground at Tarfside registered 7° which was the lowest ground temperature.

Sunshine exceeded the average only in north-western districts and in some areas near the inner Moray Firth. Stornoway was the sunniest place in Scotland with 173 hours (27 hours above average) but in contrast Kirkcaldy with 91 hours had 62 hours less than the normal April amount.

In North Aberdeenshire, Inverness-shire and in districts further north rainfall measurements were below average, but in most other areas an excess of rain was reported. In some parts of the counties of Moray, Nairn and Banff amounts were only 25 to 50 per cent. of average while in the Galloway district and in some areas of Bute, Kintyre and Central Perthshire amounts more than 200 per cent. of average were recorded. The driest spell occurred around the 15th to 18th, when only small amounts were measured over the country as a whole. The most noteworthy falls were 2.08 inches at Benmore (Argyllshire) on 20th and 2.01 inches at Glenbranter on 19th. Snow or sleet which occurred on 14 days was most widespread during the first few days of the month.

Thunder was reported on 9 days, gales on 5 days and morning fog on 23 days.

MAY 1961

The mean temperature was 50.7°F, 0.9°F above average.

The warmest days in most places occurred around the 11th-13th or around the 21st. Ardtalnaig (Perthshire) recorded 74°F on the 21st which was the highest temperature reported. The highest night minimum temperature was 55°F on the 12th at St. Abb's Head. In contrast on the 26th the day maximum temperature only rose 43°F at Lerwick and Glenlivet and the lowest night minimum temperature fell to 22°F (10° of frost) at Glenlivet on the 27th. The lowest temperature recorded by thermometers exposed on the ground was 13°F (19° of frost) at Achnagoichan (Inverness-shire) also on 27th.

Sunshine amounts were above average except in the Shetlands, in some places in Aberdeenshire and also a few places in the south-west. The sunniest place was Tiree with 235 hours and at Onich 222 hours were recorded which is 60 hours more than average.

In most districts rainfall amounts were below average, the exceptions being parts of Inverness-shire and Western Perthshire. In parts of Eastern Scotland, around Ayr and in some Solway coastal places there was less than half the normal amount for May. A marked dry spell was fairly general from 9th to 24th and many places had no rain at all during that period, which just brought them into the classification for absolute drought. The heaviest daily falls occurred generally in the first eight days and noteworthy amounts were 2.17 inches at Glenlivet (Argyll) and 2.02 inches at South Laggan (Inverness-shire) on the 7th. Snow or sleet was reported here and there on nine days and a covering of snow occurred at Balmoral on the 26th.

Thunder was reported on six days, gales on five days and morning fog on seven days.

JUNE 1961

A mainly dry cloudy month with moderate temperature.

Apart from short cool spells, temperatures were up to average, especially on the 30th when 78° was reached at Kelso, 76° at North Berwick and 75° at Dunbar, Hawick, Sornhope and Cupar. The coldest period was the 9th-12th, overnight temperature on the 11th/12th falling to 27° at Falkirk and Glenlivet. On the grass, a minimum reading of 18° (14 degrees of frost) was registered at Glenlivet and 19 at Dalwhinnie—both on the 12th. The overall mean temperature for the month was 55.3° or 0.2 below average.

Sunshine records were deficient by 40-50 hours in places, some totals being the lowest for June since 1958. The sunniest stations were Leuchars (202 hours) and Dunbar (201).

Frequent low pressure troughs from the Atlantic raised rain totals well above normal in the North-west but amounts were only about one half the normal in the East and South. On most days only small amounts fell on the drier areas whereas on the 24th, in the West, Kinlochurn registered 2.52 inches and Onich 2.32. In a broad sense, rain fell on 5-10 days in the East and South and on 15-20 in the West and North.

Gales occurred at exposed places on the 16th-19th, 22nd-24th and 28th. There was little fog but widespread thunder occurred on the 8th.

EXPLANATORY NOTES

Birth, death and marriage rates are calculated on the estimated population at 31st December, 1960.

Reference to average or average rate is to the average rate for the corresponding quarters of the five years 1956-1960.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

Report

Summary. The birth rate is below that for the third quarter of 1960 but is above the average.

The stillbirth-rate is below the average.

The marriage-rate is below that for the corresponding quarter in 1960 and also below the average.

The death-rate is below that for the third quarter of 1960 but a little above the average.

The infant mortality-rate is below the average.

Live Births. 25,110 births were registered in the quarter under review, 55 more than in the corresponding quarter of 1960. The rate per 1,000 population is 19·1 being 0·1 below that in the third quarter of 1960 but 0·7 above the average.

The proportion of illegitimate births, 4·6 per cent., is 0·2 higher than that for the third quarter of 1960 and 0·3 above the average.

Of the 25,110 births, 13,051 were of male children and 12,059 of female children, being 1,082 male births per 1,000 females. Births registered in July numbered 8,424, in August 8,468 and in September 8,218, the equivalent birth-rates being 19·0, 19·1 and 19·2 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 555 and is equivalent to a rate of 22 per 1,000 total births (including stillbirths). The rate is the same as that for the corresponding quarter in 1960 and one below the average.

Marriages. The number of marriages registered, 12,108, is 255 fewer than for the third quarter of 1960. The rate per 1,000 population was 9·2. It is 0·3 below that for the corresponding quarter of 1960 and 0·5 below the average.

Of the 12,108 marriages, 2,082 were civil marriages contracted in Registrars' offices, and 10,026 were solemnised by a minister of religion. In the corresponding quarter of 1960 civil marriages numbered 2,064, and those with a religious ceremony numbered 10,299.

Marriages registered in July numbered 4,346, in August 3,326 and in September 4,436, the equivalent marriage-rates being 9·8, 7·5 and 10·4 respectively.

Deaths. Deaths registered during the quarter numbered 13,509 and equalled a death-rate of 10·3 per 1,000 population. They are 196 fewer than were registered in the corresponding quarter of 1960. The rate is 0·2 less than in that quarter but 0·2 above the average.

Deaths registered in July numbered 4,520, in August 4,653 and in September 4,336, the equivalent death-rates being 10·2, 10·5 and 10·1 respectively.

Infant Mortality. Deaths of children under one year numbered 567 and are equivalent to an infant mortality rate of 23 per 1,000 registered live births. This rate is one less than that for the corresponding quarter of 1960 and two below the average. Among legitimate children the mortality was 22 per 1,000 births and among illegitimate children 36.

The neo-natal rate (deaths of infants under 28 days) was 17 per 1,000 live births and is one below that for the corresponding quarter of 1960.

Perinatal deaths (now amended to stillbirths and infant deaths under 7 days) numbered 922 and are equivalent to a rate of 36 per 1,000 total births (including stillbirths). This rate is the same as that for the previous quarter.

Sickness Benefit. The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 26th September, 1961, was 189,877 of which 54,493 were in Glasgow, 14,339 in Edinburgh, 7,228 in Dundee, and 6,913 in Motherwell and Wishaw.

Estimated Population
(TOTAL, CIVILIAN AND DE FACTO) BY SEX AND AGE
as at 30th June, 1961

Total population comprises the civilian population, all members of H.M. Forces of Scottish domicile and Merchant Navy at home and abroad, but excludes Forces stationed in Scotland who are not of Scottish domicile.

Civilian population comprises all civilians but excludes Merchant Navy at home and abroad.

De facto population comprises the population, of all types, actually in Scotland.

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

JULY 1961

The mean temperature was 56.5°F, 2.2° below average.

The warmest days in most places occurred on the 1st, 2nd or around the 19th. On the 1st, Dundee (Mayfield), Leuchars and Montrose each reported a maximum temperature of 76°F, which was the highest recorded anywhere in Scotland. The minimum temperature at Edinburgh (Royal Botanic Garden), Davidson's Mains, Dunbar and Kinloss was 61°F on the same date. The coldest periods were the 3rd-6th, 11th-14th and 26th-28th and the lowest maximum temperature reported was 50°F at Scalloway (Shetland) on 4th. The lowest minima were 31°F (1° of air frost) at Tarfside on 6th and 14th and 32°F at Glenmore on 14th, and the lowest temperature recorded on the grass was 25°F (7° of frost) at Dalwhinnie on the 14th.

Sunshine totals were below average generally and at Tiree the total of 106 hours was 58 hours below average and it was the lowest July amount since records began in 1927. Dunbar with 188 hours was the sunniest place.

Rainfall was in excess of normal in North-west and Central Districts and also in parts of East Lothian, Peebleshire and Lanarkshire and a little below average elsewhere. Little or no rain fell on the 1st, 2nd, 4th, 5th, and during the period 18th-23rd inclusive. The 12th was a particularly wet day and falls of over an inch were very general. Noteworthy falls reported for that day were:—4.33 inches at Ormsary, 3.27 inches at Drimnin, 2.76 inches at Achaglachgach and 2.52 inches at Ardpatrik, all in West Argyll, and falls of 2 inches or more were reported from eight other stations as far apart as Skye and the Borders.

Gales were reported on 7 days, thunder on 4 days and fog on 14 days.

AUGUST 1961

The mean temperature was 57.1°F, 0.7° below average. The warmest day was the 29th fairly generally, with maximum temperatures in the upper seventies in many places and Kinlochewe with 84°F had the highest maximum in Scotland. On the same date Cape Wrath had the highest minimum temperature (63°F). The coldest periods occurred around the 3rd, 7th, 12th, 24th and 25th. The minimum temperature at Tarfside on the 3rd and 25th was 31°F (1° of air frost) and Glenlivet recorded 24° (8° of frost) on the grass on the 12th and these were the lowest recorded for the month.

There was a deficit of sunshine in the West and North-west but most other places were up to or above average. Oban (107 hours) showed a deficit of 24 hours while in contrast Marchmont in Berwickshire (172 hours) and Edinburgh (Royal Observatory) with 173 hours had excesses of over 30 hours. Dunbar was the sunniest place with 184 hours.

Rainfall was below average only in the North and North-west and in the South-east Border country and in small areas of Perthshire and Inverness-shire. The driest periods occurred around the 10th and 11th and 28th-31st. A very wet day occurred on the 8th in all areas. Falls of over 2 inches were quite common and too numerous to detail, extending from Inverness-shire to the Borders. West Renfrewshire had particularly heavy amounts and 3.84 inches was measured at New Yetts Dam and 3.78 inches at Hole Glen Reservoir and falls of 3 inches or more were reported from 8 other stations. It was the heaviest day's rain for a considerable number of years in many places.

Gales were reported on 14 days, thunder on 5 days and fog on 10 days but Lowther Hill experienced hill fog on 22 days.

SEPTEMBER 1961

Mean temperature, 56.2°F, was 2.0° above average.

The highest temperature recorded was 78°F at Selkirk and Kelso on the 1st and other temperatures in the seventies were reported from many places on the 1st and 16th. On the night of the 1st/2nd temperature only fell to 60°F at Greenock, Kilmarnock and Sourhope (Roxburghshire). Cold spells were around the 6th/7th and during the last week. The lowest maximum air temperatures were 45°F at Lowther Hill on the 6th and 51°F at Cannich on the 28th, while the lowest minimum air temperature was at Logie Coldston 30°F (2° of frost) on 29th. On the ground, temperature fell to 26°F at Glenmore on the 25th.

Sunshine records were in excess of average only in the North and North-eastern parts of the mainland and in the Northern Hebrides. Nairn (143 hours) recorded 27 hours above its average but Kirkcaldy's total (104 hours) showed a deficit of 33 hours.

Rainfall amounts were below normal in South-east and North-east parts of the mainland and also in small coastal areas in the East Neuk of Fife and Angus. Parts of Central Perthshire on the other hand had totals of almost twice the normal amounts. On the 25th a fall of 3.50 inches was measured at Kingairloch and 2.62 inches fell on the 14th at the same place.

Gales were reported on 10 days and on 16th/17th a particularly severe gale (one of the severest on record) was widespread. At Rannoch gusts reached at least 106 mph and at Tiree 104 mph and mean hourly wind speeds of 65 mph and 75 mph were reached at these stations respectively.

Thunder occurred on 11 days, fog on 15 days but hill fog was reported at Lowther Hill on 23 days. A slight fall of snow was reported from Glenmore on 26th.

EXPLANATORY NOTES

Birth, death and marriage rates are calculated on the estimated population at 31st December, 1961;

References to average or average rate are to the average rates for the corresponding quarters of the five years 1956-1960.

Births, stillbirths and deaths are, where necessary, corrected by transfer to usual place of residence, if in Scotland.

NOTE.—*In addition to the usual quarterly return of births, deaths and marriages which begins on page 11, this Report provides on pages 3 to 10 a short preliminary return of the main population and vital statistics for the year 1961. The full statistics will in due course be given in the Registrar-General's Annual Report. The figures now given are provisional but may be taken as fairly accurate.*

Preliminary Return for 1961

The population and vital statistics for the year 1961 are given in Tables IA and IIA on pages 5 to 9 of this Return. The main features of the tables are briefly indicated below.

Population. At the Census of April 1961 the population of Scotland was 5,178,490 (provisional) and an estimate to 30th June, 1961 is 5,183,900. The natural increase during the year ended 30th June was 37,600 and the estimated net migration loss was 34,200 of which it is estimated 25,900 was to other parts of the United Kingdom and 8,300 abroad.

Births. 101,169 births were registered in 1961, a rate of 19·5 per thousand. This was 0·1 below the 1960 rate and 0·4 above the average. 1,058 boys were born for every 1,000 girls.

Stillbirths numbered 2,147 and are 105 less than in 1960. The rate is 20·8 per 1,000 births (live and still) and is the lowest stillbirth rate yet recorded in Scotland.

Marriages. Marriages registered during the year numbered 40,567. This represents a rate of 7·8 and is 0·1 above that for 1960 but 0·3 below the average. 32,968 of the marriages were solemnised by Ministers of religion, 32,876 having been preceded by proclamation of banns or by publication of notice and 92 authorised by Sheriff's licence in accordance with the provisions of the Marriage (Scotland) Act, 1939. 7,595 marriages were contracted in the offices of Authorised Registrars and 4 were registered on the authority of the Court of Session. Civil Marriages comprise 18·7 per cent. of the total marriages.

Deaths. Deaths from all causes numbered 63,928 and equalled a death-rate of 12·3 per thousand. The rate is 0·6 above the average. The average in the five years before the war (1934-1938) was 13·8.

The infant mortality, neonatal and stillbirth rates were each the lowest ever recorded. There were 2,615 infant deaths under one year giving a rate of 25·8 per 1,000 live births compared with the previous record of 26·4 in 1960. Of these deaths 1,813 were under four weeks, a neonatal rate of 17·9. The perinatal deaths numbered 3,721 and equalled a rate of 36·0 per 1,000 total births. There were 2,147 still births giving a rate of 20·8 per 1,000 births, live and still.

Table IIA shows the total number of deaths registered in Scotland during the year, classified by sex and cause, and also the number by age and cause.

A comparison of deaths by age-groups in 1961 and 1960 shows increases in the age-groups 1-4 and 35-85. The greatest increases were in age-groups 55-64 and 75-84.

The death rate at ages under 45 was 1·9 per 1,000 and at ages 45 and over 32·0. In 1960 the corresponding rates were 1·9 and 30·7.

Causes of Death. The number of deaths from the principal epidemic diseases* was 405,269 more than in 1960. The death rate was 5 per 100,000. Most of the increase was due to influenzal deaths which numbered 365 compared with 104 in 1960. There were 16 deaths from meningoccal infections (19 in 1960), 18 from measles (2), 4 from whooping cough (10), 2 from streptococcal sore throat (1), none from diphtheria (0) and none from typhoid fever (0). As in 1960 there were no deaths from acute poliomyelitis.

Deaths from tuberculosis (all forms) dropped to a low record figure of 481. The death rate was 9 per 100,000, 4 below the average. 433 of the deaths were from respiratory tuberculosis, 40 fewer than in the previous year and the rate of 8 was 4 below the average. Deaths from non-respiratory tuberculosis at 48 were 12 more than in 1960.

Deaths from cancer numbered 11,221 and were 188 more than in 1960 and 342 above the average for the years 1956-1960. Deaths from cancer of the respiratory system accounted for 2,610 compared with 2,549 in 1960 and the average number of 2,344.

Deaths from heart disease numbered 22,048 and were 675 more than in 1960. They accounted for 34 per cent of all deaths.

From vascular lesions affecting the central nervous system there were 9,839 deaths against 9,850 in 1960, from diabetes 599 against 555, and ulcer in the stomach and duodenum 555 against 562.

Deaths from diseases of the respiratory system (not tubercular, malignant or influenzal) numbered 5,697 which were 931 more than in 1960. They included 2,473 from pneumonia (except of newborn) and 2,516 from bronchitis, the rates per 100,000 being 48 and 46 respectively. Compared with 1960 the number from pneumonia was 465 more and bronchitis 302 more.

Deaths from diseases and accidents of pregnancy and childbirth numbered 37 as against 34 in 1960. This represents a rate of 0.4 per 1,000 births (live and still).

Deaths from congenital malformations and diseases of early infancy numbered 2,147 and were 25 more than in 1960.

Deaths attributed to violence numbered 2,911 and are 44 more than in 1960. Of these 408 were ascribed to suicide, 722 to road transport accidents, 1,213 to accidents in the home and 568 to other forms of violence, the number from these causes in 1960 were 408,691, 1,050 and 718 respectively.

In Table IA will be found the main figures and rates for Scotland, cities, large burghs and remainder of counties with individual figures for each area.

On page 10 will be found tables giving details of deaths from accidents in the home and transport accidents by sex, age and broad cause groups for the year 1960.

* See note on page 5.

Quarterly Return of the Births, Deaths and Marriages registered in Scotland during the Quarter ended 31st December, 1961

REPORT

Summary. The birth-rate is below that for the fourth quarter of 1960, but is above the average.

The stillbirth-rate is below the average.

The marriage-rate is above that for the corresponding quarter in 1960 and also above the average.

The death-rate is above that for the fourth quarter of 1960, and also above the average.

The infant mortality-rate is below the average.

Live Births. 24,563 births were registered in the quarter under review, 268 fewer than in the corresponding quarter of 1960. The rate per 1,000 population is 18·8 being 0·1 below that in the fourth quarter of 1960 but 0·3 above the average.

The proportion of illegitimate births, 4·8 per cent., is 0·6 higher than that for the fourth quarter of 1960 and 0·7 above the average.

Of the 24,563 births, 12,592 were of male children and 11,971 of female children, being 1,052 male births per 1,000 females. Births registered in October numbered 8,750 in November 7,822 and in December 7,991, the equivalent birth-rates being 19·8, 18·3 and 18·1 respectively.

Stillbirths. The number of stillbirths registered during the quarter was 507 and is equivalent to a rate of 20 per 1,000 total births (including stillbirths). The rate is the same as that for the corresponding quarter in 1960 and 3 below the average.

Marriages. The number of marriages registered, 9,895, is 426 more than for the fourth quarter of 1960. The rate per 1,000 population was 7·6. It is 0·4 higher than that for the corresponding quarter of 1960 and 0·3 above the average.

Of the 9,895 marriages, 1,874 were civil marriages contracted in Registrars' Offices, 8,020 were solemnised by a minister of religion, and one was registered on the authority of the Court of Session. In the corresponding quarter of 1960 civil marriages numbered 1,827 and those with a religious ceremony numbered 7,642.

Marriages registered in October numbered 5,150, in November 2,128 and in December 2,617, the equivalent marriage-rates being 11·7, 5·0 and 5·9 respectively.

Deaths. Deaths registered during the quarter numbered 16,472, and equalled a death-rate of 12·6 per 1,000 population. They are 375 more than were registered in the corresponding quarter of 1960. The rate is 0·3 higher than in that quarter and 0·6 above the average.

Deaths registered in October numbered 4,940, in November 5,276 and in December 6,256, the equivalent death-rates being 11·2, 12·4 and 14·2 respectively.

Infant Mortality. Deaths of children under one year numbered 631 and are equivalent to an infant mortality rate of 26 per 1,000 registered live births. This rate is one less than that for the corresponding quarter of 1960 and three below the average. Among legitimate children the mortality was 25 per 1,000 births and among illegitimate children 36.

The neo-natal rate (deaths of infants under 28 days) was 18 per 1,000 live births and is the same as that for the corresponding quarter of 1960.

Perinatal deaths (stillbirths and infant deaths under 7 days) numbered 900, and are equivalent to a rate of 36 per 1,000 total births (including stillbirths). This rate is the same as that for the previous quarter.

Sickness Benefit. The number of new claims to Sickness Benefit under the National Insurance Acts made at National Insurance Offices of the Ministry of Pensions and National Insurance in Scotland during the 13 weeks ended 26th December, 1961 was 269,456, of which 76,542 were in Glasgow, 21,650 in Edinburgh, 9,959 in Dundee and 9,843 in Aberdeen.

85+	753	3.93	1,719	4.09

This abridged life table is constructed from the estimated population in 1961 and the total deaths registered in that year.

The column headed l_x shows the numbers who would survive to exact age x out of 10,000 born who were subject throughout their lives to the death probabilities indicated by the 1961 death records. Column e_x is the "expectation of life", that is the average future lifetime which would be lived by a person aged exactly x , if likewise subject to these death probabilities.

Meteorological Notes

Supplied by the Meteorological Office, Edinburgh

OCTOBER 1961

Mean temperature 49.9°F was 1.5° above average. The highest temperature recorded was 68°F at Lossiemouth on 2nd and Gordon Castle on 13th. On the night of the 6th/7th the temperature never fell below 56° at Rhuvaa in Argyllshire. The warmest periods occurred during the first week and again around the 13th and it was coldest during the last week and around the 19th. The lowest maximum temperature was recorded at Glenmore on the 28th when the temperature only rose to 41°F. Widespread air frost was experienced during the nights from 27th to 30th and a minimum temperature of 25°F (7° of air frost) was recorded at Balmoral and Logie Coldstone on 30th. The lowest temperature on the ground 18°F (14° of frost) occurred at Braemar on 30th also.

Sunshine totals were mainly above average over the southern half of the country and slightly deficient in the North. Paisley with 103 hours was 28 hours more than normal while Oban with 60 hours was 10 hours less than average. The sunniest place was Dunbar with 125 hours.

Rainfall amounts were slightly below the normal October figures in areas adjacent to the coasts of the counties of Berwick, Fife, Angus, North Aberdeen, Caithness and Sutherland but above average elsewhere. The driest period occurred around the 12th-14th. A fall of 2.40 inches was recorded at Ardrishaig on the 16th and among other heavy falls were 2.32" at Stilligarry (So. Uist) on 22nd, 2.31" at Barnacarry (Loch Fyne) on 21st and 2.24" at Strathyre on 23rd.

Gales were reported on 19 days, thunder on 17 days and fog on 15 days. Sleet was reported on 11 days and snow on 2 days. Auroral displays were reported from one place or another on 16 nights.

NOVEMBER 1961

The mean temperature 41.5°F. was 0.8° below average.

The warmest period occurred at the very beginning of the month when the highest maximum (day) temperature of 59°F. was recorded at Dunbar on the 1st and the highest minimum (night) temperature of 50°F. was reported from St. Abb's Head and Benbecula on the same date. The coldest spell was around the 26th to 28th and the lowest minimum air temperature of 10°F. (22° of frost) was measured at Braemar on the 28th and Dalwhinnie on 27th and 28th. The lowest temperature on the ground fell to 1°F. (31° of frost) at Dalwhinnie on the 27th. Temperature remained below freezing point at Cannich on the 26th and at Dalwhinnie on the 27th when a maximum of 29°F. was registered at both places.

Sunshine totals were above average in most districts, the exceptions being West Renfrewshire and North Shetland where there were small deficits. Craibstone with 88 hours (an excess of 24 hours) had its sunniest November since records commenced in 1924. Udney (Aberdeenshire) had the largest sunshine total of 98 hours.

Rainfall was below average except in some areas of Wester Ross, West Inverness-shire, Lanarkshire and West Renfrewshire. Only small amounts of rain were reported during the period 10th to 20th but on the 1st falls of 1.93 inches at Inversanda (Argyllshire) and 1.77 inches at Kinlochleven were reported and on the 7th there were several falls of over 1.50 inches in the extreme South West.

Gales were reported on 16 days and thunder on 10 days. Fog was prevalent, occurring at some place or another on 25 days. Snow or sleet occurred on 17 days and snow was reported as covering the ground in places on 9 days. Auroral displays were seen here and there on 13 nights.

DECEMBER 1961

The mean temperature was 34.8°F., —4.9° below average.

The mildest period occurred around the 10th-16th, and the highest day temperature recorded was 57°F. at Colonsay on 10th, 13th and 15th. The warmest night minimum temperature was 50°F. at Tiree and Rhuvaa on the night of the 15th/16th. The coldest period was at the end of the month. The lowest minimum air temperature recorded was at Cannich when —8°F. on the night of the 29th/30th was registered. The same station reported the lowest maximum temperature of 10°F. on the 29th, and also the lowest ground temperature of —8°F. on the night of 29th/30th.

Sunshine totals were above average in most districts but there was a deficiency in the Shetland Isles and near Glasgow. At Eskdalemuir 63 hours of sunshine were reported, which is 159% of average and the sunniest December since records commenced. The sunniest place was Prabost in Skye with 66 hours and the most sunless parts were in the Shetlands where Baltasound had only 3 hours and Lerwick 9 hours.

Rainfall was above normal over the Eastern half of the country and below average in the West. In Banffshire and adjacent districts amounts were 150/200% of average. The driest days were the 3rd, 7th and only small amounts of rain were reported fairly generally during the third week. Amongst the heaviest falls in 24 hours were 2.01 inches at Arkinglas in Argyllshire and 2.00 inches at Dalmigavie Lodge in N.E. Inverness-shire on the 4th.

Gales were reported on 21 days and thunder on 6 days. Fog occurred at some place or another on 26 days and auroral displays were seen on 19 nights. Snow was reported on 23 days.
